

Index

- actuation, 2
- aerospace systems, 6–9
- aircraft, 7
- atmospheric systems, 2
- auto-land, 8
- automobiles, 6

- B-2, 8
- battlefield management, 2
- biological engineering, 2
- buildings, control of, 5

- centrifugal governor, 5
- classical control, 8
- closed loop, 6
- closed loop control, 2
- communications
 - systems, 6
- component failures, robustness to, 2
- computation, 2
- computer numerically controlled (CNC)
 - machining, 6
- computer science
 - relationship to control, 4
- consumer electronics, 4
- control
 - as enabling technology, 4, 6, 8
 - as hidden technology, 4
 - history of
 - early examples, 5
 - principles, 3
 - successes of, 6, 7
 - system, 2
- cruise control, 5, 6

- differential equations, 8
- disturbance rejection, 2, 4

- disturbances, 3
- dynamics, 2, 4, 5
 - aircraft, 7, 8
 - economic systems, 2

- ecological systems, 2
- economic systems, 2
- emissions control, 6
- engineering science, 3

- F-16, 8
- feedback, 3, 5, 6
 - in biological systems, 2
 - loop, 2
 - versus control, 2
- flight control, 7–9
- fly-by-wire, 8

- game theory, 4
- global climate dynamics, 2
- global positioning system (GPS), 6

- Honeywell, 5

- input/output models, 3
- integral action, 6
- interconnection, 3
- Internet, 6

- manufacturing, 6
- model reduction, 4
- modeling, 3, 8
- modern control, 8
- multi-variable control, 8

- natural science, 3

- operations research, 4

- optimization, 4
- physics
 - relationship to control, 3
- pilots, 7–9
- pollution, 6
- power control, in communications, 6
- precision guided weapons, 6
- process control, 6
- protocols, 2
- public awareness, 6

- radar, 6
- real-time systems, 4
- reconnaissance, 9
- redundant architectures, 8
- reliability, 6, 8
- resource allocation, 4
- rockets, 6

- safety, 8
- satellites, 7
- sensing, 2
 - inertial, 6, 8
- simulation, 8
- space systems, 6
- stability, 2, 3
 - augmentation, 7, 8
- surveillance, 9
- systems perspective, 3

- temperature control, 5
- thermostat, 5
- time delay, 5
- transfer functions, 8

- uncertainty
 - component or parameter variation,
3
 - unmodeled dynamics, 3
- unmanned vehicles, 9

- wireless networks, 6
- World War II, 6, 7
- Wright Flyer, 7, 8

- X-29, 7, 8
