

## On JEM

---

Jerry is singular in manifold ways—  
his papers display each excitable phase—  
space-time, falling cats,  
geodesics, strange (h)att...s—

(Their reading might take all the rest of our days)

solid, fluid, and cloud...  
O let us sing loud  
bundles of praise! Just  
one cautionary note:

Students, postdocs, colleagues, take care!  
A 'Jerry Remark' could consume your career.
